

BDC-99 DUST COLLECTOR

IDEAL FOR THE TOUGHEST JOBS AND APPLICATIONS

The Blastrac BDC-99 is a heavy duty dust collection system that combines power, efficiency, safety, and productivity all into one durable machine. The BDC-99 is the dust collector for the professional. The Blastrac BDC-99 can be equipped with a Longopac bagging system, big-bag system or dust bin kit which is easy to mount and handle. The Blastrac BDC-99 dust collection system is standard equipped with a M-class cartridge filter or optional H-class filter kit. For a safe, dust free and perfectly clean jobsite Blastrac has designed a full range of consumables and optional items to get the best possible results out of your dust collector.

USER FRIENDLY

Easy to manoeuvre and transport due to the robust wheels with brake systems. User friendly design, just connect the hose to the dust collector and you are ready to go.

SAFE WORKING ENVIRONMENT

Every Blastrac machine should be connected to a Blastrac industrial dust collector. This means that you are able to work dust free, creating a safe working environment.

FOR HEAVY DUTY WORK

Our range of dust collectors is especially created to be connected to our surface preparation machines. The high suction power, filter options and large dust bin/bag capacity make sure that all dust is safely collected.

BAGGING SYSTEM

Our Longopac system allows you to collect the dust in easy to handle packages of 25 kg without dispersing dust. The tube-like bagging system is dust free since the bags are replaced and sealed from the outside – there is no contact with the waste.

CONTINUOUSLY WORKING

Limited downtime is essential for any successful job. Our dust collection systems are especially designed to reduce as much as possible these downtimes.

MULTIPLE FILTRATION OPTIONS

Our range of dust collectors offers multiple filtration options in order to suit all your needs and to protect the health & safety of the operators.

GREEN TECHNOLOGY

Our dust collectors, like any other Blastrac machine, do not use any chemicals or waste valuable drinking water.
